A

Abrasive, Aluminous. Hutchins. (P.) .. 1128
Abrasive, New aluminous. Hutchins *566
Absorption of gases in spray systems and towers. Baker *122
Absorption tower packing. Resistance to gas flow. Correction. Zeisberg 244
Acetaldehyde from ethylene by electrolytic oxidation. Curme. (P.) 40
Acetates from carbohydrates. Randall. (P) 1128
Acetic acid, From calcium carbide. Rooney *847
——From corn-cobs 407
——From ethylene by electrolytic oxidation. Curme. (P.) 40
Acetone by fermentation. Weizmann and Hamlyn. (P.) 662
——From acetic acid. Morton. (P.) 40
——From Burton still waste gases 407
——From calcium carbide. Rooney *847
Acetylene, Acetone from. Matheson. (N.) 710
——From hydrocarbons. Curme. (P.) .. 40
——Solvent for. Smith and Curme. (P.) 708
Acid fumes on Riverside Drive. Mudge .. 676
Acids, Pumping with compressed air. Oliphant *408
Acid-resisting materials:
——Acid resisting metals. Matignon. (S.) 376
——Cu-Al-Fe bronze. Kowalke 37
Adsorption, Theory of. Patrick. (N.) ... 950
Air, Compressed, Pumping acid with. Oliphant *408
Air conditioning in the industries. Leason 279
Air conditioning prevents explosions ignited by static electricity 614
Air-lift system for pumping acids. Oliphant *408
Airplanes, Discharge of clouds from *407
Ajo, Arizona, Leaching operations at 388
Alaska, Committee urges pulp wood development 1176
Alaska-Gastineau Mining Co., Milling plant of. Daveler *361

ALCOHOL:

——As motor fuel. Tunison 297
——As motor fuel 952
——Dangers of denatured alcohol. Chute. 149
——From coal in England 487
——Industrial alcohol under the new law and regulations. Tunison 513
—— Changes in formulas. Tunison 1056
——Industrial alcohol. Rodebush. (N.). 665
——In patent medicines 1132
——Primary and secondary. Dehydrogenation by catalytic oxidation. Moureu and Mignonac. (S.) 1083
——Transportation regulation for denatured alchol in Texas 437
——Wood alcohol as beverage. Nolan 533
——Wood alcohol must be labeled poison 910
——Woodine 321
Alizarine cyanine, British mfr. 1033
Alkalis. Caustic mixtures. Armstrong. (P.) 1174
——Industry in 1919 2
Alkaline earth chlorides. Schotoff. (B.P.) 1129
Allotropism among metals. Getman. (N.) 1000

ALLOYS:

——Acid-resisting Cu-Al-Fe bronze. Kowalke 37
——Duralumin in aëronautics 1125
——Electric-resistance. Schench. (P.).. 1085
——For feed water regulator floats. Mumford. (B.P.) 1129
——Iron-nickel, Magnetic properties of. Yensen. (S.) *1039
——Magnesium 61
——Melting point of. Determinations of.. *27
——Nickelene 1191
——Non-ferrous. Nomenclature 1191
——Tungsten 15
Aloxite. Hutchins *565
Alsace. Potash mines in 1206
Alsatian petroleum industry 1124
Alum, Chrome. Hultman. (B.P.) 1129
Alumina from labradorite 544
——Mfr. of Halvorsen. (P.) 812

ALUMINUM:

——Acid-resisting qualities of *230
——Aluminum rolling-mill practice. R. J. and M. B. Anderson
I. Commercial pig and scrap 489
II. Melting furnaces—Ingot pouring 545
III. Ingot heating and mill calculations 599
IV. Slabbing *647
V. Finishing operations *697
——As engineering material 298
——Norwegian industry 544
——Powdered or granulated. Terreta. (P.) 661
Aluminum alloys, Duralumin in aëronautics 1125
——Fatigue tests on. Gibson. (N.) 1191
Aluminum chloride, Anhydrous. Heap and Newberg. (P.) 857
Aluminum nitride, Electric furnace for. Shoeld. (P.) *184
Alunite, Research on 713
Amalgamation plates, Steaming. Pearce and Thomas. (N.) 711
American Association for the Advancement of Science, Research grants 342
American Association of the Baking Industry 199
American Association of Engineers' convention 813

AMERICAN CERAMIC SOCIETY:

——Joint committee on ceramic research. 104
——Philadelphia meeting. Announcement 104
—— Report *438
——Chicago meeting. Program 1217

AMERICAN CHEMICAL SOCIETY:

——Spring meeting. St. Louis. Program. *534
—— Report *768
—— Industrial excursions *858

AMERICAN ELECTROCHEMICAL SOCIETY:

——Spring meeting. Boston. Announcement 245, 442
—— Program 533
—— Report *725
American Engineering Standards Committee 294
——New bodies represented on 1218
American Foundrymen's Association to have new department 861
American Gas Association meeting 1090
American Institute of Baking 396

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS:

——Spring meeting. Canada. Itinerary and program *1089
——Reversing in and out ratio of members. Olsen 676

AMERICAN INSTITUTE OF MINING AND METALLURGICAL ENGINEERS:

——Annual meeting, New York:
—— Program 104, 245
—— Report *343
American Metal Co. buys L. Vogelstein & Co. 55
American Pharmaceutical Association research grant 536
American-Scandinavian Foundation fellowships 485
American Smelting & Refining Co. report .. 908

AMERICAN SOCIETY FOR TESTING MATERIALS:

——Asbury Park meeting. Report 1189
American Zinc Institute:
——Annual meeting, Chicago 999

AMMONIA:

——Absorption of, In spray system *124
——Catalyst for oxidation of. Perley 125
——Oxidation of. Thomson. (P.) 1127
——Oxidation of. Toniolo. (B.P.) 1129
——Synthesis of. Claude. (P.) 812
——Synthetic. Heat interchanger for. Greenwood. (P.) *812
——Synthetic. Gardiner. (P.) 661
Ammonia saturator. Roberts. (P.) 948
Ammonium nitrate, Mfr. of. (P.) 857
——Mfr. of. Partington. (B.P.) 992
Ammonium perchlorate, Mfr. of. Wang. (B.P.) 1040
Ammonium sulphate, Caking of. Atwater and Schulze 373
——Cost of mfr. from oil shale 21
——From gypsum. (S.) 424
——Mfr. using sodium bisulphate. Vis. (P.) 904
——Purifying. Sloss. (P.) 662

ANALYSIS:

——Analytical control of electrolytic zinc production. Bradley *651
——Arc images in. Mott. (N.) 728
——Automatic gas-analysis apparatus for Government helium plants 832
——Carbon in iron. Yensen. (N.) 728
——Chlorbenzenes. Bourion. (S.) 1084
——Determination of graphitic carbon. Selvig and Ratliff. (N.) 726
——Determining active strength of sulphate cooking liquor 462
——Gas, Determining light oil in. Bird.. *705

ANALYSIS—*Continued:*

——Gas, Spark coil for explosion pipettes. Taylor 1013
——Gas wash-bottle for referee's test for sulphur. Maze *1070
——Iron: (see Iron and Steel, Analysis)
——Limitations of Ledebur method for oxygen in steel. Cain and Pettijohn. (S.) *375
——Moisture determination apparatus ... *946
——Monel metal, Rapid method. Covitz .. 31
—— Comment. Horner 436
—— Comment. Stausser 1144
——Of coal pyrite for sulphur 106
——Power hammer for pulverizing pig-iron samples 946
——Tin in brass or bronze. Raymond ... 1056
Annapolis, Prominent chemists lecture at. 342
Anthracene press-cake, Treatment of. Andrews. (P.) 569
Anthranilic acid, Precipitating from aqueous solution. Potter. (P.) 378
Anthraquinone by catalytic oxidation. Andrews. (P.) 378
Anthraquinone, Purification of. Andrews. (P.) 569
Antimony compounds, Proposed tariff on. 664
Antimony pigments. Morris. (B.P.) 1175
Apparatus, Meeting of makers of scientific 860
——Scientific, Imports of 756
——Standardization of. Freas. (N.) 775
Arc images in chemical analysis. Mott. (N.) 728
Arc phenomena. Steinmetz 458
Argentina, Wood pulp manufacture 1030
Arizona Copper Co. mill, Dust exhaust system at. Hull *207
Arizona Copper Co., Stack losses at. Ambler *305
Arsem vacuum furnace *67
Asbestos paper, History of. Bowles 208
Asphalt industry, Miller *749
Assaying, Volatilization in, Dewey. (N.). 347
——Same paper in full 797
Association of Scientific Apparatus Makers 860
Atmospheric Nitrogen Corporation 1131
Atomic structure of metals in solid solution. Comment. Jeffries 100
——Comment Smith 340
——Reply. Feild 580
Atoms, Structure of. Langmuir. (N.) .. *486
Australia, Electric steel furnaces in. (S.) 947
——Flax industry 988
——Foreign trade, 1918-1919 851
——Marking of imported goods 540
——Production of tin in. Lewis. (S.).. 903
Austrian engineers, Aid for 906
Auto-electrolysis 966

B

Babbitt: (see Bearing metal.)
Baking industry, Chemical engineer in. Lippert *893
Baking industry to be studied 199
Barium hydroxide from barium sulphide. Barnes. (P.) 89
Barium nitrate from barium sulphide. Davis. (P.) 378

BATTERIES:

——Primary:
—— Reserve dry cell. Batchelor. (P.). 856
——Secondary:
—— Reactions of lead accumulator. MacInnes. (N.) 727
—— Separators for. Rowson. (Aust.P.) 522
Bearing metal, Crystal growth in. Mahin. (N.) 775

BELGIUM:

——Artificial silk industry, Prosperity of 1144
——Industries one year after the armistice 645
——Penalties for commercial fraud 892
——Plate and window glass industry 487
——Steel cartel, Dissolution of 976
——Sugar production 1188
Belting, Leather, Measuring slip 255
Belt joining, Improved method 506
Benzaldehyde from toluene by catalytic oxidation. Weiss and Downs. (P.).. 522
Benzene, Catalytic oxidation of. Weiss. (N.) 102
Benzoic acid from toluene. Coblentz and Walker. (P.) 812

BIBLIOGRAPHIES:

——Nitrogen fixation 588
——Tungsten 16
Bismuth, Darling. (P.) 377
Bisulphite liquor manufacture. Baker. (N.) 781
Black ash, Extracting soda salts. Vrastel. (N.) 781
Black liquor from sulphate pulp, Treating. Olsson. (P.) 378
Blast-furnace: (see also Iron and Steel, Furnace)
Blast furnace, Comparative study of electrically and coke heated. Guédras. (S.) 990
Blast-furnace op. Rust. (P.) *377
Blast roasting at Port Pirie. Rigg 518
Bleaching powder. Mfr. of. Rudge. (P.).. 857
Bleaching with ozone 806

*Illustrated; (P.), (B. P.), (Aust. P.), (Can. P.)—United States, British, Australian and Canadian patents, respectively; (S)—Synopsis; (N.)—Papers read at society meetings but not printed in full.

ELECTRODES:

——Carbon. Mfr. of. (S.) 521
——Graphitized. Mfr. of. Hinckley. (P.) 41
——Increasing durability of rod electrodes for Schönherr type furnace. Heier. (P.) *138
——Manufacture of carbon electrodes. Morrison 741
——Söderberg self-baking continuous. Richards. (N.) 732
——Support for, In Heroult type furnace. Dyossen. (P.) *138
Electro-endosmosis. Briggs. (N.)..... 950
Electrolytic lightning arresters. Plates for. Coulson. (P.) 857
Electrometallurgy in 1919 1
Electron Society 780
Elmore process for zinc-lead ores..... 164
Emulsions, Soap-water, Separation of fixed oils from. Ayres *1057
Enamel investigations at Bureau of Standards 810
Enameling, Cleaning and pickling iron and steel for. Danielson. (N.)..... 32
——Of cast iron. Menne. (N.)..... 1107
——Preparation of steel for. Whitford. (N.) 1107
Enamels Division, Amer. Ceramic Soc.... 440
Engineer in national affairs. Hoover..... 349
Engineering Advertisers' Association.... 584
Engineering and accident prevention..... 667
Engineering Conference 861
Engineering Council. Sixth member society 816
Engineering ethics. Code of 1042
Engineering practice. Regulation by license under state laws..... 101
Engineering societies conference..... 910
——Correction. Richards 964
Engines Tests on small engines at high back pressures. Flowers, Pepper and Field *318

ENGLAND:

——Alcohol from coal in..... 487
——Artificial silk mfr. in..... 853
——British blast furnace practice. Buckley. (S.) 660
——British chemical industry..... 56, 200, 389, 628, 828, 1013
——British officials to visit industrial centers 937
——British plans for trade information... 685
——British research associations..... 462
——Dried-flowers industry 1038
——Dye industry in 535
——Exports to U. S., 1919 389
——How British chemists are organizing. Hamer 597
——Industrial courts in 968
——Iron and steel production, 1919..... 744
——London metal prices for twenty years. 1076
——Low-temperature carbonization of coal 692
——Origin of British National Physical Laboratory 264
——Plate glass industry in..... 989
——Research associations in 264
——Touring exhibition for British industry 508
——Unique British advertising scheme... 1075
Ether, Catalytic production of. Maihle and de Godon, (S.) 329
——Continuous production of. Barbet. (P.) *617
Ethics, Engineering, Code of 1042
Ethyl alcohol: (See Alcohol.)
Ethylene, Compressed. Backhaus. (P.).. 1216
——Electrolytic oxidation of. Curme. (P.) 40
Ethylene chlorhydrin from oil gas. Brooks *629
Explosion risks in dyestuff industry..... 34

EXPLOSIVES:

——Detonating fuse. Cope. (P.)..... 1174
——High explosives. Comey. (N.)..... 1000
——High explosives similar to dynamite. Bryan and Swint. (P.) 661
——Lead azide detonators. Stabilizing. Hudson. (P.) 856
——Nitrostarch, Stable. Anchors. (P.). 856
——Stabilizing nitrostarch. Snelling and Lams. (P.) 662

EXPORT STATISTICS:

——Chile:
—— Iodine, 1880-1918..... 659
—— Nitrate, 1880-1918 659
——Mexico:
—— Petroleum, 1919 932
——United States:
—— Caustic soda, Dec., 1919..... 348
—— Cement, 1919 704
—— Chemicals, Jan., 1920 650
—— Feb., 1920 736
—— March, 1920 952
—— Glycerine, Dec., 1919 348
—— 1919 226
—— Petroleum products 504
—— Phosphate rock 1913-1917..... 308
—— Soda ash, Dec., 1919..... 348
—— Total value, Feb., 1920..... 734

F

Fansteel Products Co., Mfr. of tungsten at. Jones *9
Faraday Society thanked for war work.. 1043
Fatigue of metals, Investigation of..... 462
Fatigue research in tinplate manufacture. 223
Federal Club 1218
Federal Reserve act, Revised text..... 536
Federal Trade Commission, Citations by.. 1131
Federated American Engineering Societies, Organization 1087
Feet, Sizes of 496
Feldspar as pottery material, Staley. (N.) 54
Ferro-alloys:
——Electric furnace manufacture of. Gibson. (N.) 730
——Production of. Johnson. (P.)..... 184
Ferrocerium. Hirsch. (N.) 731

FERROMANGANESE:

——Mfr. in electric furnace at Great Falls. Bardwell 681
——Not covered by War Minerals Relief act 596
——Use of spiegeleisen in steel manufacture. Hibbard 209
Ferrosilicon. Raven. (N.) 730
Ferrosilicon, Mfr. of. Johnson. (P.)... 184
Ferrovanadium metallurgy. Saklatwalla. (N.) 730
Fertilizer industry in Southern States.... *311
Fertilizer regulations proposed 998
Fertilizer situation. Whitney..... 1021
Fiber, Vulcanized. Allison..... 1126
Fibers, Mfr. of. Weygan. (B.P.)..... 948

FILTRATION AND FILTERS:

——Classification of filter plates and frames. Sperry *493
——Continuous electrical mechanical filter. Meston. (P.) 1127
——Experimental filter 18
——Filtration and filters. Faber..... 17
——Scientific control of filter station. Wright.....I. 1015, II. *1077, III *1119, IV. *1165, V. 1201
Fire brick: (See Refractories.)
Flax industry, Australian 988

FLOTATION:

——Contribution to the study of..... 397
——Laboratory, Utah State School of Mines *878
——Precipitating copper sulphide prior to. Sulman and Picard. (P.)..... 991
——Research on 255
——Use of sulphur-soaps in. Tucker, Edser and M. S. Ltd. (B.P.)..... 992
Flour testing 894
Food drafts for European relief. Hoover.. 436
Forest Products Laboratory decennial celebration Announcement 1045
——Appropriation 535
Formaldehyde from natural gas. Bailey. (P.) 377
Formic acid, Duty on 198
Fractures, Mechanism of. de Freminville. *983
France, Chemical industries, Development of 975
——Duties on chemicals 804
——Hydro-electric power development in. 1070
——Phosphate situation in 736
Freas system for laboratories 581
Freight car shortage, Relieving 816

FUELS:

——Liquid fuels *296
——New type 565
——Scarcity of fuel oil..... 1100
Fuel economy, Loss due to carbon in furnace refuse. Berry *179
Fuller's earth, Apparatus for treating spent. Husted. (P.) 41
Furfural from corncobs. Dunlap and Fischlowitz. (N.) 774
Furnace for testing firebrick under load at high temperatures. Lovejoy .. *109
Furnaces: (see Iron and Steel Furnaces; Electric Furnaces: Blast Furnaces, etc.)
Gainesville castor oil plant. Shrader and Goetz *833
Gallic acid. (B. P.)..... 1216
Galvanizing large steel parts by hot process. (S.) 567
Galvanometers. Northrup *944
Garnet, Electric furnace reduction of. Thompson and Davenport 596

GAS AND GASES:

——Absorption of, In spray systems and towers. Baker *122
——Analysis. Automatic apparatus for Government helium plants 832
——Apparatus for determining light oil in. Bird *705
——Blast-furnace, Cleaning. (S.) *423
——Coal, Influence of carburation on crystallization of naphthalene in pipes. Ab-der-Halden. (S.) 990
——Industrial heating with. Loebell. (N.) 1044
——Liquefaction of. Brown. (S.) 1083
——Natural Gas Conservation Conference resolutions 1217
——Nitrous, Concentrating. Halvorsen (P.) 137
——Poisonous, Storage of 1218
——Producer, Sulphur content of clean, cold. Kaufmann 544
——Research opportunities in gas industry. Searle. (N.) 1044
——Supplementing natural gas supply with coke-oven gas. Ramsburg. (S.) 1214
——Testing natural gas for carbon black. Neal *358
Gas-fired furnaces, Surface vs. bunsen combustion in. Kowalke. (N)... 320
Gas industry, Crisis in 1090
Gas plants, Preventing accidents in. Conner 421
Gas wash-bottle for referee's test for sulphur. Maze *1070
Gasoline, Casinghead, Blending with naphtha 883
Gasoline substitutes. Meigs. (N.) 756
Gelatine, General chemistry of. Loeb. (N.) 949
Gelatine, Mfr. of. Turner. (Aust. P.) 522
Geological Survey, Proposed consolidation with Bureau of Mines 952
General Chemical Co. buys Western Chemical Mfg. Co. 197
General Briquetting Co., Experimental plant. Stillman *1035

GERMANY:

——Chemical works, Secret of success .. 321
——Dye companies pay big dividends ... 1090
——Dyes, Scarcity of 909
——Export and domestic prices for iron. 780
——German Works Councils Act 1172
——Marks, Chemists' Club will purchase 508
——Nitrate industry 604
——German Nitrogen Syndicate. Caro .. 686
——No liquidation of American property in 666
——Opinion of Chemical Foundation.... 348
——Potash deposits of 945
——Potash production and prices 341
——Potash situation 1125
——Prolongation of German patents. Zwingenberger 1056

*Illustrated; (P.), (B. P.), (Aust. P.), (Can. P.)—United States, British, Australian and Canadian patents, respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.

INDEX

GLASS:
——American glass in Canada 423
——American glassware, Present status of, Sullivan 29
——Belgian industry, Condition of 487
——Bohemian glass industry 464
——British plate glass industry 989
——Chemical glassware, American 30
——Colored 29
——For cooking utensils 30
——For electric light bulbs 29
——Granulite used in British industry .. 1082
——Illinois Glass Co. plant *859
——Low-expansion 29
——Report of Glass Division, Amer. Ceramic Soc. 440
——Selective spectrum absorbing 30
——Welders' glasses 30
——X-ray shield 30
Glue, Inferiority of shellac as 360
Glue, Mfr. of, Turner, (Aust. P.) .. 522
Gluten, Determination in flour 894
Glycerine by fermentation (B. P.) 1129
Glycerine, United States foreign trade in 225
Glycols from oil gas, Brooks *629

GOLD AND SILVER: (see also Silver.)
——Amalgamated aluminum plates for precipitating from cyanide solution, Gordon, (P.) 282
——Metallurgy of, In 1919 3
——Milling plant of Alaska-Gastineau Mining Co. Daveler *361
——Solubility of gold in cyanide solutions, White, (S.) 183

GOVERNMENT:
——Castor oil plant, Shrader and Goetz, *833
——Chemists' salaries 488
——Contracts, Liquidation of suspended . 341
——Employees' inventions 1045
——Kelp plant to continue 357, 535, 776
——Officials organize club 1218
——Oil corporation proposed 1043
——Photosensitizing dyes 405
——Picric acid plant for sale 472
—— Plant sold 604
——Surplus supplies:
—— Disposal of, In 1919 200
—— Sulphuric acid 342
Grain unloaders, Use in chemical industry 219
Granulite, Use in British glass industry . 1082
Graphite, For crucibles 220
——Purifying, Turin, (B. P.) 424
Graphite ores, Ore-dressing methods for, Spearman, (S.) 521
Graphitic acid, Hulett and Nelson (N.) 726
Graphitic carbon, Determining, Selvig and Ratliff, (N.) 726
Great Falls, Ferromanganese mfr. at, Bardwell 681
Great Falls smelter, Reminiscences of early years at, Repath *111
Great Western Sugar Co. to build new plant 1132
Gum copal, Export embargo in Sierra Leone 1213
Gutta-percha industry 792

H

Halogen substitution products, Koehler, (P.) 991
Heat interchanger for synthetic ammonia process, Greenwood, (P.) *812
Heat interchangers, Double pipe, Richter *551
Heatmeter, New compensated, Frey 100
Helium, Bill to prohibit export of 246
Hexanitrodiphenylamine, Marshall, (P.) 616
High-frequency coil, Artificially cooled, Northrup, (P.) 662
Holland, Chemical industry in 654
Hongkong shuts out American dyes 1133
Hongkong trade in chemicals 1122
Hoover and the Presidency, Engineers .. 484
Hoover awarded Civic Forum medal ... 341
Hoover for President, Snyder 245
Hull, Vegetable-oil industry of 1034
Hunt, Robert W., Receives Hunt medal.. 1046

HYDROCARBONS:
——Acetylene from, Curme, (P.) 40
——Cracking, (B. P.) 568
Hydrochloric acid, Sludge acid for mfr. of, Lasher, (P.) 1127
——From sulphur dioxide and chlorine, Tobler, (P.) *904
Hydrocyanic acid, Production of, Briner and Baerfuss, (S.) 329

HYDRO-ELECTRIC POWER:
——Canadian development 1200
——French developments 1070
——Muscle Shoals development, Jones.. *417
Hydrofluoric acid, Mfr. of, Fickes, (P.) 90

HYDROGEN:
——Application in hydrogenation of oil, Barnitz *745
——Chemically active, Wendt and Grubb, (N.) 771
——Electrolytic production of, Barnitz, *201
——Reduction of tungstic oxide by *12
Hydrogen overvoltage, Effect of alternating current on, Goodwin, (N.) *727
Hydrogenation of oils, Barnitz *745
Hydrogenation, New catalyzer for, Richardson 793
Hydrosulphite solutions, Preserving, MacIntyre, (P.) 1041
Hydroxynaphthoquinones, Dyes from halogenated, Wheeler, (P.) 569
Hypochlorite cell, Electrolytic, Gerstle, (P.) 1216
Hypochlorous acid, Mfr. of 631

I

Idaho phosphate rock for Orient 666
Illinois Glass Co. plant *859
Illinois, University of, Research graduate assistantships in engineering at . 199
Illinois, University of, Short ceramics course 864
Immigration conference 584
Import license, General, Extension of .. 110

IMPORT STATISTICS:
——United States:
—— Chemicals, Jan., 1920 650
—— Feb., 1920 736
—— Glycerine, 1884-1919 225
—— Petroleum products 504
Inagua, Bahamas, Revival of salt industry 706
India, Oilseed crop, 1919-20 forecast .. 1032
——Sandalwood oil industry 987
——1919-20 cotton crop 910
——1919-20 sugar crop 1026
Indigo and vegetable extract dye compound, Fries, (P.) 1174
Industrial Conference plan for labor disputes 813

INDUSTRIAL HYGIENE:
——Dangers in dyestuff industry, Cone.. 33
——Elimination of dust hazard at Niagara Falls plants 348
——Engineering and accident prevention . 667
——Explosion hazard in steel mills from partly consumed coal dust 422
——Industrial safety codes 437
——Pennsylvania Safety Congress 488
——Personal element in safety program for the foundry, Gartland 323
——Preventing accidents in gas plants, Conner 421
Industrial notes, 47, 95, 144, 192, 240, 384, 432, 480, 624, 720, 823, 872, 916, 960, 1007, 1140, 1184.
Industrial representation in Standard Oil Co, Hicks 607
Industrial research at Mellon Institute, Savage *240
Infusorial earth, Phalen 981
Infusorial earth industry, Bigot, (S.) 947
Insecticides, Nicodust 1045
Insecticides, Research on 253
Institution of Mining and Metallurgy awards medals 246
International Chamber of Commerce 864
International Joint Conference Council of printing industry 198
Inventions by Government employees 1045
Inverse-rate method for melting points .. *28
Iodine from kelp, Randall, (N.) 775
Iodine, Purification of, Carter, (P.) .. 378
Ionization of strong electrolytes, Kendall, (N.) 772
Iowa Section, A.C.S.:
——Officers 55
Iron, Cast, As chemical engineering material, Hoffer, (S.) 567
Iron alloys, Influence of chemical composition and thermal treatment upon properties of, Gunlich and Goerens, (S.) 376
Iron : nickel alloys, Magnetic properties of, Yensen, (S.) *1039
Iron oxides, Reduction by fuel gases, Eastman, (N.) 437
Iron and Steel Institute, Carnegie Research Fund 199
Iron and Steel market 43, 91, 140, 187, 235, 284, 332, 380, 428, 475, 523, 571, 618, 668, 715, 759, 818, 866, 911, 954, 1002, 1091, 1134, 1179, 1219

IRON AND STEEL:
——Analysis:
—— Limitations of Ledebur method for oxygen in steel, Cain and Pettijohn, (S.) *375
——Corrosion and protective coatings: (see Metal Protection and Corrosion.)
——Defects:
—— Effect of nitrogen on steel, Comstock and Ruder *399
—— Inclusions, Effect on stress distribution, McCance, (S.) 184
—— Nature of defects revealed by deep etching of transversely fissured rails, Rawdon *505
—— Rails, Shattered zones in 1190
—— Rails, Transverse fissures in 1190
—— Woody structures of fractures of transverse test pieces taken from certain special steels, Cohade... *259
——Effect of various elements:
—— Effect of copper in steel 281
—— Sulphur and phosphorus in 297
—— Contemporary foreign opinion, Rawdon 609
—— Investigations 952
—— Limits of 1189
——Foundry Practice:
—— Removing scale from steel, Marins, (P.) 185
——Furnaces:
—— Blast-furnace:
—— Blast-furnace flue dust, Atcherson, (N.) 391
—— British blast-furnace practice, Buckley, (S.) 660
—— Cleaning blast-furnace gas, (S.) *423
—— Electric steel furnaces in Australia, (S.) 947
——General:
—— Fifty years progress in iron and steel, Stead, (S.) 1130
—— Steel industry during 1919 7

IRON AND STEEL—*Continued:*
——Heat Treatment:
—— Cementation, Jones, (B.P.) 424
—— Distortion of alloy steels on hardening, Mathews, (N.) 393
—— Elastic development of steel, Cornell *677
—— Hardening after long reheating, Van Oordt, (P.) 233
——Mechnical Work:
—— Forgeability of iron-nickel alloys, Yensen, (N.) 394
—— One-piece gun construction, Bridgman, (N.) 391
—— Physical properties of rolled rifle barrels, Moister *1025
—— Resistance of steels to machining, Fremont, (S.) 947
——Metallography:
—— Crystallography of alpha and beta iron, Giolitti *585
—— Effects of strain and heat treatment on metal structure, Nishikwa and Asahara, (S.) 1130
—— Ferrite, Genesis of, Giolitti *737
—— Magnetic analysis, Sanford and Kouwenhoven, (S.) 232
—— Microstructure at high temperatures, Rawdon and Scott, (N.) 394
—— Microstructure of iron and mild steel at high temperatures, Rawdon and Scott *787
—— Comment, Rawdon 1012
—— Modified Rosenhain furnace, Scott and Freeman, (S.) *811
—— Photographing etched sections at low magnifications, Monypenny, *882
—— Relation between mechanical hardness and grain size of carbon steels 786
—— Relationship between dendritic structure and ferrite mesh, Giolitti *921
—— Similarity of magnetic change in cementite and ferrite, Movius and Scott *1069
——Physical properties:
—— Lewis impact machine *325
—— Mechanism of fractures, de Freminville *983
—— Old rails with high internal strains contained no fissures, Cushing, (S.) 615
—— Physical changes below the thermal critical range, Jeffries, (N.) ... 395
—— Strength of steel at high temperatures, McNiff, (S.) *660
—— Tensile strength of boiler plate, French, (N.) 392
——Processes:
—— Cast iron, Synthetic cast iron, Keller *83
—— Duplex:
—— Large mixer in new French steel plant, (S.) *855
—— Synthetic steel, Keller, (P.) 90
—— Electric pig:
—— Gray iron castings from magnetite in electric furnace 876
—— Scandanavian practice, Richards 61
—— Electric steel, Scandanavian practice, Richards 62
—— Malleable iron:
—— Graphitization of white cast iron, Archer, (N.) 392
—— Graphitization of white cast iron, Merica and Gurewich, (S.) *40
—— Open hearth, Acid:
—— Balanced reactions in steel mfr, McCance *634
—— Melting light scrap in acid open hearth, Hadfield, (P.) 233
—— Mfr. of high-grade steel by acid open-hearth process, de Maré. *1063
—— Pig iron, High phosphorus pig-iron from glauconite, Meadows, (P.) 569
—— Quadruplex:
—— Steel refining, Walker, (P.) ... 89
—— Semi-steel, Manufacture of semi-steel for shells, Hall, (N) 391
Comment, Harrington 1188
——Special steels:
—— Comparative test upon high-speed steels, Langhammer I 829
II *889
III *939
IV 969
—— Distortion of alloy steels on hardening, Mathews, (N.) 393
—— High-speed steel, McKenna, (N.), 731
—— High-speed steel, Arnold's vanadium-molybdenum, Arnold, (S.) 1130
—— High-speed tool steel, crucible or electric steel for 172
—— Molybdenum, Sargent, (N.) 1190
—— Nickel steels, Critical ranges of, Scott, (N.) *394
—— Stainless steel, New uses for 1118
Isopropyl alcohol from Burton still gas.. 407
Italy, Chemical industry, Development of.. 791
——Seeks vegetable oil in Japan 1170
——To use explosives in agriculture 1014

J

JAPAN:
——Bronze powder and metal leaf industry in 734
——Commercial pottery of 702
——Cottrell precipitators in, Hirota and Shiga *276
——Encourages beet sugar in Manchuria. 786
——Foreign trade in chemicals, etc. 376
——Lead and zinc industry 1198
——Rubber industry, (S.) 568
——Sulphuric acid industry in 1162
——Wages in 883

*Illustrated; (P.), (B. P.), (Aust. P.), (Can. P.)—United States, British, Australian and Canadian patents, respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.
